Scrolling Animation for Navigation Links: <script>

```
document.querySelectorAll('nav a').forEach(anchor => {

    anchor.addEventListener('click', function (e) {

        e.preventDefault();

        document.querySelector(this.getAttribute('href')).scrollIntoView({

            behavior: 'smooth'

        });

    });

});
```

</script>

Toggle Menu for Mobile Devices:
- Toggle the navigation menu for small screens.

<script>

```
document.getElementById('menu-bars').addEventListener('click', function() {

    document.querySelector('.navbar').classList.toggle('show');

});
```

</script>

Image Gallery Lightbox Effect:
- Add a lightbox effect for the image gallery in the "about" section.

html
<script>

```
document.querySelectorAll('.image img').forEach(image => {

    image.addEventListener('click', function() {

        // Open image in a lightbox or perform other actions

        alert('Image clicked!');

    });

});
```

</script>

Form Validation:

- Basic form validation using JavaScript. This example checks if the name and email fields are not empty.

```
<script>

  document.querySelector('form').addEventListener('submit', function(e) {

    const nameInput = document.querySelector('[placeholder="name"]');

    const emailInput = document.querySelector('[placeholder="email"]');

    if (nameInput.value.trim() === '' || emailInput.value.trim() === '') {

      e.preventDefault();

      alert('Please fill in both name and email fields.');

    }

  });

</script>
```

Social Media Icons Animation:

- Add a simple animation effect to the social media icons.

```
<style>

  .follow a {

    transition: transform 0.3s ease-in-out;

  }

  .follow a:hover {

    transform: scale(1.2);

  }

</style>
```
